

CLAIMIQ DEMO INSURANCE

AsterDrive Elite Protect Private Car Policy

Policy Code: AD-ELITE-02 | Version: 1.0 | Effective for Prototype: 01 August 2026

Synthetic training-free reference document for the ClaimIQ DTAI capstone prototype

IMPORTANT PROTOTYPE NOTICE

This document is a fictional, educational policy/SOP created for a student AI prototype. It is designed to resemble Indian private motor insurance practice but is not filed with IRDAI, not issued by a licensed insurer, and must not be sold, relied upon for real claim settlement, or presented as legal advice.

Prepared for retrieval-augmented generation (RAG), rule-engine testing and live application demonstration.

Document Map

The numbered clauses below are intentionally stable so that ClaimIQ can cite them as retrieval sources and rule-engine evidence.

Section	Title
1	Purpose and eligibility
2	Core comprehensive cover
3	Elite bundled add-ons
4	Zero Depreciation Protect
5	Consumables Protect
6	Engine & Gearbox Protect
7	Invoice Gap Protect
8	Tyre, key and roadside benefits
9	Own-damage assessment
10	Exclusions and special limitations
11	Claims conditions
12	Settlement and customer contribution
A	ClaimIQ machine-readable rule summary

1. Purpose and Eligibility

1.1 AsterDrive Elite Protect is a synthetic premium private-car package policy combining comprehensive own-damage and statutory third-party protection with selected add-on benefits intended to reduce out-of-pocket repair costs.

1.2 Eligibility for the bundled add-ons is limited to vehicles not exceeding 5 years of age at policy inception unless the Schedule states otherwise. Vehicle make/model, IDV, inspection status and repair network requirements remain subject to underwriting acceptance.

1.3 The Policy Schedule identifies which Elite benefits are active. No add-on is implied merely because it is described in this wording.

2. Core Comprehensive Cover

2.1 Core own-damage insured events are fire/explosion, theft, riot/strike, earthquake, storm/flood/cyclone, accidental external means, malicious act, terrorism, transit and landslide/rockslide, subject to exclusions and terms.

2.2 Third-party liability applies in accordance with the Motor Vehicles Act, 1988 and applicable law. ClaimIQ does not calculate bodily-injury awards or statutory tribunal compensation.

2.3 IDV is the amount shown in the Schedule. CTL review is triggered when the aggregate reasonable retrieval and/or repair cost exceeds 75% of IDV.

3. Elite Bundled Add-ons

Benefit	Default prototype limit / condition
Zero Depreciation Protect	Up to 2 admissible partial-loss claims per policy year.
Consumables Protect	Included with covered repair, subject to ₹15,000 aggregate per claim.
Engine & Gearbox Protect	Up to ₹1,50,000 per policy year for specified accidental water-ingress / lubricant-leak events, subject to conditions.

Benefit	Default prototype limit / condition
Invoice Gap Protect	Eligible total-loss/CTL/theft claims for vehicles ≤3 years old; capped at original invoice reference in Schedule.
Tyre & Rim Protect	Up to ₹25,000 aggregate per policy year; accidental tyre/rim damage only.
Key Replacement	Up to ₹20,000 per policy year.
Roadside Assistance	Up to 4 service events per policy year within supported territory.

4. Zero Depreciation Protect

4.1 For the first two admissible partial-loss claims during the policy period, no depreciation deduction is made on replacement parts otherwise subject to depreciation under the base own-damage section.

4.2 Zero Depreciation Protect does not waive: compulsory or voluntary deductible; non-covered items; betterment unrelated to accident damage; salvage adjustments; or exclusions.

4.3 This benefit does not apply to total-loss or CTL claims. A third and subsequent own-damage claim during the same policy period is assessed under standard depreciation unless the Schedule states a higher claim count.

4.4 Tyres, tubes, batteries and items with separate sub-limits remain subject to the specific wording of their benefit even where Zero Depreciation Protect applies.

5. Consumables Protect

5.1 Where an own-damage repair is admitted, the insurer will reimburse reasonable consumables used directly in the covered repair, including engine oil, coolant, brake fluid, transmission fluid, grease, AC refrigerant, nuts, bolts, screws, clips, washers, sealants and similar shop consumables, up to the limit in the Schedule.

5.2 Routine service consumables, quantities unrelated to the accident, fuel, cleaning products and maintenance replacements remain excluded.

6. Engine & Gearbox Protect

6.1 Subject to the Schedule, the insurer will consider direct internal engine/gearbox damage resulting from accidental ingress of water into the engine or leakage of lubricating oil/coolant caused by an insured accidental event.

6.2 The benefit requires prompt mitigation. Damage aggravated because the insured repeatedly attempted to start or drive the vehicle after water ingress, warning indication or material loss of lubricant may be reduced or excluded to the extent of the aggravation.

6.3 Wear and tear, gradual deterioration, pre-existing defects, manufacturing defects, ordinary mechanical failure and damage unrelated to an insured event are not covered.

6.4 Engine-protect claims above ₹75,000 or involving complete engine/gearbox replacement require specialist technical review under the applicable claims SOP.

7. Invoice Gap Protect

7.1 For an eligible Total Loss, CTL or unrecovered theft of a vehicle not exceeding three years of age, the insurer may pay an additional benefit representing the gap between the base-policy total-loss settlement and the lower of: (a) original ex-showroom invoice value recorded in the Schedule, or (b) the maximum Invoice Gap amount stated in the Schedule.

7.2 Registration charges, insurance premium, finance interest, accessories not declared, extended warranty and dealer packages are excluded unless explicitly included in the Schedule.

7.3 This benefit is not payable for partial loss.

8. Tyre, Key and Roadside Benefits

8.1 Tyre & Rim Protect

Accidental cut, burst or rim deformation arising from a sudden road event may be considered up to the stated limit. Normal tread wear, puncture-only events, manufacturing defects and racing/off-road competition are excluded.

8.2 Key Replacement

Reasonable cost of replacement/reprogramming of an insured vehicle key following accidental loss, theft or damage is covered up to the Schedule limit, subject to proof of ownership and security requirements.

8.3 Roadside Assistance

Towing, battery jump-start, tyre change, minor on-site assistance, emergency fuel delivery and lockout assistance may be arranged subject to territorial availability, event limits and vendor terms. Cost of parts/fuel is borne by the insured unless separately covered.

9. Own-Damage Assessment

9.1 For claims not eligible for Zero Depreciation Protect, standard depreciation applies: 50% to rubber/nylon/plastic, tyres/tubes, batteries and airbags; 30% to fiberglass; nil to glass; and age-linked depreciation of 0%, 5%, 10%, 15%, 25%, 35%, 40% and 50% for other parts across the standard age bands.

9.2 Painting depreciation, where applicable, is 50% of material cost; if the paint bill is consolidated, material is treated as 25% of the consolidated charge for prototype calculation.

9.3 Repair is preferred over replacement where safe, technically reasonable and economical. Premium/luxury parts remain subject to verification of part number, necessity and market reasonableness.

9.4 The default compulsory deductible is ₹2,000 per own-damage event for this Elite product, plus any voluntary deductible shown in the Schedule.

10. Exclusions and Special Limitations

- Consequential loss except where specifically restored by an add-on.
- Wear and tear, corrosion, gradual deterioration and routine maintenance.
- Mechanical/electrical failure not resulting from an insured accidental event.
- Damage due solely to continued operation after a material warning or unsafe condition where such continued operation aggravates the loss.
- Loss arising from use outside permitted use or outside geographical scope.
- Driving under intoxication or by an unauthorized/unlicensed person, subject to applicable law.
- Fraudulent claim or forged evidence, subject to due investigation and applicable law.
- Commercial use, racing, speed testing and track events unless specifically endorsed.
- Cyber-only or software malfunction without insured physical damage, unless expressly covered.

11. Claims Conditions

11.1 Claim intimation should be made as soon as reasonably practicable. Emergency steps to protect life/property and prevent further damage take precedence over waiting for authorization.

11.2 For theft or suspected criminal acts, police reporting and cooperation with investigation are required.

11.3 For engine/water-ingress claims, the insured should stop the vehicle, avoid repeated restart attempts and arrange towing where reasonably possible.

11.4 For premium repair claims, the insurer may request OEM diagnostic reports, part photographs, scanning reports, repair measurements, old-part retention and/or specialist inspection.

11.5 Network garage cashless repair is preferred for bundled benefits. Non-network reimbursement remains possible but is subject to verification of necessity, reasonableness and evidence.

12. Settlement and Customer Contribution

12.1 Admissible amount = covered reasonable repair cost + admissible active add-on benefits - deductible - non-covered items - applicable policy sub-limits - salvage/customer contribution.

12.2 ClaimIQ must display base-policy settlement separately from add-on benefit so the user can trace exactly which policy component changes the settlement.

12.3 Where coverage is uncertain, the system must route to human review rather than infer a benefit from generic product knowledge.

Appendix A - ClaimIQ Machine-Readable Rule Summary

Rule ID	Rule	Value / Logic	Source
PB-ZD-LIMIT	Zero dep claim count	First 2 admissible partial-loss claims	4.1
PB-ZD-TL	Zero dep TL/CTL	Not applicable	4.3
PB-CONS	Consumables cap	₹15,000 per claim	5.1
PB-ENG	Engine protect cap	₹1,50,000 per policy year	6.1
PB-ENG-ESC	Engine specialist trigger	Estimated engine/gearbox benefit >₹75,000 or full replacement	6.4
PB-RTI-AGE	Invoice gap age	Vehicle ≤3 years	7.1
PB-TYRE	Tyre/rim cap	₹25,000 per policy year	8.1
PB-KEY	Key cap	₹20,000 per policy year	8.2
PB-RSA	RSA events	4 per policy year	8.3
PB-DED	Default deductible	₹2,000 + voluntary deductible	9.4
PB-CTL	CTL trigger	Repair/retrieval >75% IDV	2.3

Drafting Basis and Regulatory References

This synthetic document is informed by public Indian motor-insurance materials and is intentionally re-written rather than copied. The following sources were used as drafting references for realism:

- Motor Vehicles Act, 1988, including statutory third-party insurance requirements.
- IRDAI-hosted Private Car Package Policy wordings, including own-damage perils, parts depreciation, painting treatment, CTL treatment and standard claim conditions.
- IRDAI (Protection of Policyholder's Interests, Operations and Allied Matters of Insurers) Regulations, 2024.
- IRDAI (Insurance Surveyors and Loss Assessors) Regulations, 2024 and related claims-governance principles.

Where this document specifies internal monetary thresholds, routing cut-offs, risk scores, service standards or approval levels, those values are synthetic insurer operating assumptions created for the ClaimIQ prototype and are not represented as IRDAI-prescribed thresholds.
